

2 Rose Avenue,  
Maclean 2463

Dear Mayor,

Please reconsider your plan of cutting down the trees for the reasons of shade, environment and leisure.

Trees are part of the environment & provide shade for living & non-living things. In Australia, because of Australia's hot conditions many Australian's get Sun Cancer. Trees provide shade as well as a shelter from the hot sun.

Trees provide homes for many creatures. If the trees are cut down the animals will have no home & some no source of food. Some birds & other animals may find new homes in dangerous places.

Trees provide a source of fun for all ages. The children climb trees for enjoyment & to build cubby's in. Also people stand under the shades of the tree & have a picnic or fish.

In conclusion, please reconsider your plan of cutting down the trees for the reasons of shade, environment & leisure.

yours Sincerely,
