

Dear Mayor

Grafton 2460
24-3-03

Please reconsider your plan of taking down the trees which line our streets for the reasons of shade, tourism and environment.

Shade is important. We need shade because of the sun. Australia is one of the most affected countries by the sun.

Tourism attracts money to Grafton. The Jacaranda trees are attracting lots of tourists. The Jacaranda trees are a great source for Grafton.

Environment we need a lot of. Without the environment the birds would be down in population. The oxygen would also be down.

In conclusion, please reconsider your plan to cut down the trees.

Yours Sincerely
